

Fulvic Acid

Capture the true value of applied nutrients.
Maximise nutrient efficiency.
(B4796)

BioStimulant

Why use Madumbi's Fulvic Acid?

- Optimise **effective use of applied nutrition** to get the most out of your inputs.
- **Reduce negative impacts** of herbicide and other chemical applications.
- Improve drought tolerance and **reduce potential for water stress**.
- Improve root and shoot development.
- **Maximise plant productivity and yield potential**.

What is Madumbi's Fulvic Acid?

- A concentrated, high quality extract of Fulvic Acid available in a ready to use 8% liquid formulation or a 80% cost effective and freight friendly powder formulation.
- Fulvic Acid is a powerful, all natural, tried and tested agricultural input.
- Known for it's properties as a **natural chelator** and **nutrient carrier** improving nutrient availability, absorption and utilisation in the plant.
- Increases the permeability of cell walls for more efficient water uptake.
- An effective **natural plant growth promotor**, stimulates cell division and elongation.
- An effective **detoxifying agent** aiding the breakdown and removal of toxic elements.

Application

Use as a natural chelator by combining with foliar application of plant nutrients.

Soil Application

Liquid - 5-10 L per Ha minimum dilution 1:20

Powder - 2 kg - 5 kg per Ha applied as part of fertiliser blend

Foliar Application

Liquid - 1-3 L Ha minimum dilution 1:100

DIY Fulvic Acid Liquid

120 g per L water, mix with vigorous agitation and filter insoluble component before use. Apply as per liquid recommendation.
