BioInoculants

The BioInoculant range consists of products containing beneficial micro-organisms. Beneficial micro-organisms create the link between the soil and the plant root system assisting in delivery of vital nutrition and growth promoting elements while protecting from pathogens.

Rhizovital Available in: 500 ml	B4201	Highly concentrated liquid formulation of the beneficial bacteria <i>Bacillus amyloliquifaciens</i> . Designed for inoculation into the root zone, aiding with mobilisation of nutrients and protection from pathogens.
Eco-Rhiz Range Available in: 5-10 Ha packs	L9273 L9277	A unique combination pack for inoculation of specified leguminous crops with nitrogen fixing Rhizobia. All packs contain rhizobium plus Eco-T (<i>Trichoderma harzianum</i>) for stimulation of healthy root growth. Currently available for Soya and Lucerne.

BioManagement

The BioManagement range consists of plant protection products whose active ingredient is biorational in its origin and efficacy. This range includes fungi, bacteria, baculoviruses and plant extracts. All play a vital role in a successful IPM approach.

Bolldex Available in: 500 ml & 200 ml	L8895	A nucleopolyhedrovirus (HearNPV) suspension concentrate formulation for the biological reduction of African bollworm (ABW) <i>Helicoverpa armigera</i> larvae.
Cryptex Available in: 500 ml	L8037	A granulovirus suspension concentrate formulation for the biological reduction of False Codling Moth larvae (FCM) <i>Cryptophlebia leucotreta</i> .
Madex Available in: 500 ml	L7950	A granulovirus suspension concentrate formulation for the biological reduction of Codling Moth larvae (CM) <i>Cydia pomonella</i> on apples and pears
Madex Twin Available in: 500 ml	L9781	A granulovirus suspension concentrate formulation for the biological reduction of Oriental Fruit Moth (<i>Grapholita molesta</i>) and Codling Moth (<i>Cydia pomonella</i>) larvae on apples, pears and stone fruit.
Eco-77 Available in: 250 g	L7495	<i>Trichoderma harzianum</i> , a fungal inoculant for the protection of pruning wounds on grape vines against Eutypa and on tomatoes and cucumbers against Botrytis
Eco-Bb Available in: 1 kg & 300 g	L8469	<i>Beauveria bassiana</i> , a fungal inoculant for the control of whitefly and suppression of red spider mites on cucumbers, tomatoes, beans and brinjals.
Eco-T Available in: 1 kg & 250 g	L6938	<i>Trichoderma harzianum</i> , a fungal inoculant for the control of plant root diseases and for enhanced plant growth.
Eco-T Ezi Flo Available in: 4 kg & 1 kg	L9276	A graphite and talc based formulation of <i>Trichoderma harzianum</i> . A complete application solution for mechanical planters that combines the benefits of Eco-T with seed lubricants for optimum planting efficiency.
Delfin Available in: 1 kg	L9761	<i>Bacillus thuringiensis</i> subspecies <i>kurstaki</i> (Btk) in a flowable granule formulation for the control of Lepidoptera larvae. (African Bollworm <i>Helicoverpa armigera</i> on lettuce.)

BioStimulants

The BioStimulant range consists of products that contain natural plant growth stimulants, usually in combination with holistic nutritional supplementation. This combination is designed to improve overall health of the crop, build stress tolerance and support and stimulate various stages of plant growth.

Madumbi Humic Acid Available in: 70% Granules 25 kg	B4797	Concentrated, high quality extracts of Humic Acid sourced from ancient Leonadite deposits. An essential soil conditioner and nutrient stabiliser for use with synthetic fertilisers.
Madumbi Fulvic Acid Available in: 80% Powder 25 kg	B4796	Concentrated, high quality extracts of Fulvic Acid, a natural chelator, plant growth regulator and detoxifying agent. For use as an additive to foliar applications as a natural chelator and growth promotor.
Activate N Available in: 5 Ha and 1 Ha single use packs.	B4417	A combination of natural plant-growth promoting bacteria formulated to enhance nutrient utilisation, particularly Nitrogen. Naturally enhance and stabilise Nitrogen availability throughout the growing season.
AgriSil K50 Available in: Liquid 1250 L, 20 L & 5 L	B3756	Fully soluble, liquid formulation Potassium Silicate designed for agricultural use. The ultimate Silica supplement to aid in building plant stress and disease tolerance.
V¹² Multi Available in: 20 L, 5L	B4512	The all in one vitality package, for foliar feeding all plant nutrients from A-Zinc.
V¹² Micro Available in: 20 L, 5L	B4514	A foliar feed loaded with amino acid chelated micro nutrients for fast and effective handling of potential micro nutrient deficiencies.
V¹² Initiate Available in: 30 kg	B4513	Plant nutrition tailored to support and optimise the initial plant growth phases, germination or bud burst.
V¹² Shoot Available in: 20 L, 5 L	B4510	Plant nutrition tailored to support and optimise the vegetative growth phase.
V¹² Fruit Available in: 20 L, 5L, 1L	B4511	Plant nutrition tailored to support and optimise flowering and fruit.
V¹² Finish Available in: 20 L, 5L	K9557	A unique blend of minerals and amino acids designed to support the crop during the final stages of reproductive growth, fruit full and ripening.
Vita-Soy plant Available in: 20 L	B4691	A specially formulated blend of Mo, Zn, Mn and B for the support of early growth and optimal nitrogen fixation for Soya.
BioCarb K Available in: 20 L	K9558	Efficient, plant available potassium in a chloride free formulation for foliar feeding on crops with a sensitivity to chloride.
